## Europe Seeks Oil Control, U. S. Is Warned

E. L. Doheny Tells Senators  
England and Germany Are  
Forging Ahead by Sway  
Over Rich Oil Fields

He Points to Mexico

Urges Use of Military Power  
to Protect Business Inter-  
ests Now Across Border

WASHINGTON, Sept. 11.—Every great government in the world, with the exception of that of the United States, is reaching out for new petroleum producing properties, Edward L. Doheny, president of the Mexican Petroleum Company, told the Senate Foreign Relations subcommittee today. He stressed the importance to American business and military power of extending and protecting American oil holdings, particularly in Mexico.

Mr. Doheny said he learned, while in Europe a few weeks ago, that the British government had acquired 65 per cent of the stock of the Anglo-Persian Oil Company, controlling 65,000 square miles of rich oil territory. "It is absolutely necessary for the government of Mexico," he added, "while the newspapers within a day or two have told us that British naval forces have occupied the Huku region, and probably will assume commercial control, while leaving present control to Turkey."

Had Eye on Oil Land  
"At the time of the German drive in March, 1918, the British lion was at bay, the outcome of the war was in doubt; yet even in that trying hour the British government was still so far-sighted, so far-seeing that it was conducting its campaign for the control of Mesopotamia, with its riches of oil."

because it is necessary to look the facts in the face. Other governments are giving full recognition to the supreme importance of petroleum products in the industrial world, and we must do so or we will pay for our shortsightedness."

Addresses of 3 Primary  
Voters Puzzle Prosecutor

He Cannot Find Persons at the  
Residences Given on the  
Poll Books

Assistant District Attorney Pecora, investigating the charges of primary frauds made by former Senator William M. Bennett, who was defeated by Representative Fiorello H. La Guardia for the Republican nomination for President of the Board of Aldermen on the fact of the returns, said yesterday that three persons who voted in the primaries were not at the addresses given on the poll books.

SCRANTON, Penn., Sept. 11.—John Mitchell's body arrived here early this evening and was taken to St. Peter's Cathedral, where it will lie in state until to-morrow morning.

Charles M. Jacobs,  
Noted Engineer,  
Dead in London

Charles Matthias Jacobs, one of the foremost civil engineers of this country, died in London, according to a cable dispatch received in this city yesterday. Mr. Jacobs had been retained by the French government to prepare plans for the proposed tunnel under the Seine River from Rouen to Havre, which he designed several years ago. Mr. Jacobs was famous in this country for his part in the construction of the Hudson and Pennsylvania tubes, as well as many other important engineering works.
